**EIDD DfA Europe Summer School
Viana do Castelo September 8 – 13, 2019**

CALL FOR PARTICIPANTS

EIDD - DESIGN FOR ALL SUMMER SCHOOL 2019

Interdisciplinary approaches in Design for All

We are very pleased to invite you to apply for the first Design for All Summer School to be organised by EIDD – Design for All Europe.

Following directly on the celebration of our 25th anniversary in 2018, EIDD – Design for All Europe is now further expanding its activities, creating a platform that aims to achieve greater sharing, creation and dissemination of knowledge.

The summer school is one of the actions now being undertaken by the EIDD academic working group, the ACANET, in order to stimulate professionals in Design for All thinking and doing. EIDD – Design for All Europe's commitment is to create ambassadors all over Europe and to implement knowledge about Design for All in real time.

WHAT

The summer school will be a selective programme limited to a maximum of 20 excellent participants who would like to improve their knowledge and insights on Design for All thinking. For one week, 20 participants and 5 teachers will meet in beautiful surroundings in Portugal's Norte region to share, build and disseminate knowledge. Contributions will be encouraged and accepted from all professional research domains and design fields, as we are convinced that stimulating interdisciplinary collaboration will lead to interesting cross-fertilisation.

Working side-by-side in a cross-disciplinary setting, participants and teachers will learn from each other in a dynamic atmosphere. Built up intrinsically by the pioneers of Design for All, this vision is fundamental for every creative profession and an essential element of design attitudes and practice, of vital benefit to all sectors and fields of society in both the public and the private sectors.

create

CALL FOR PARTICIPANTS

08.09 - 13.09.2019

create

HOW

During the week, participants will attend lectures and take part in interactive workshops focusing on real issues, for which they will end up making and creating real design solutions. In parallel with the active work, they will also have the opportunity to visit specialised companies and entrepreneurs that work with a Design for All strategy, as well as relevant institutions. From ideation to concept to real design: this week will enable participants to dive deep into Design for All.

WHERE

The 2019 summer school will take place in the beautiful town of Viana do Castelo in Portugal's Norte region. Set in an area rich in historic and cultural heritage, Viana do Castelo is a coastal city with rich flavours and a well-deserved reputation for warm Portuguese hospitality and its excellent fresh seafood.

WHEN

8-13 September 2019

WHO

Who should apply?

If you have ambitions, enthusiasm and interest in Design for All, as a mindset, a strategy and a practice, this summer school is for you! If you want to become an ambassador and a practitioner in Design for All, you should apply to join us.

REGISTRATION

How to apply?

Send a letter of motivation (max. 500 words) by May 10th 2019 to dfa@uhasselt.be, including information about the following three main points:

1. Who are you?
2. What is your motivation for taking part in the summer school?
3. Describe your interest in Design for All, as a mindset, a strategy and a practice and tell us how you can contribute.

The EIDD Design for All Europe Executive Board will then select the 20 participants.

What are the costs?

A registration fee of €500 per participant will cover the costs of your meals (lunch and dinner) and invited speakers and tutors. Travel to and from the nearest airport in Porto will be at your own expense. All other costs (lodging, local transfers, logistics) will be covered by EIDD – Design for All Europe and local organisers.

A large amount of existing research on Dfa is currently inaccessible for many researchers (language barriers, unpublished material, large fees, ...). The Dfa Europe ACANET aims at collecting and spreading Dfa knowledge on design processes, methodologies, and design solutions in an inclusive way. All Dfa Europe ACANET publications will be available in open access for all users.

By exposing the available Dfa knowledge (WE DISSEMINATE), by sharing visions (WE CONNECT) and by setting up knowledge creating activities (e.g. summer school), and by elaborating joint research projects between members, the Dfa Europe ACANET intends to become an incubator for knowledge regarding real inclusion and corresponding innovation.

DfA Europe ACANET Academic Network

A SCIENTIFIC AND DISSEMINARY POINT OF VIEW

As a member of the E I D D Design for All network, the European Design for All Europe (E I D D) network is the largest of its kind in Europe. It is a network of scientists and researchers who are working on the topic of Design for All in Europe.

At the E I D D Design for All Europe, we are working on the topic of Design for All in Europe. We are working on the topic of Design for All in Europe. We are working on the topic of Design for All in Europe.

Our research is focused on the topic of Design for All in Europe.

Research on this topic is an important part of our work. It is a network of scientists and researchers who are working on the topic of Design for All in Europe.

- 1. Research on the topic of Design for All in Europe.
- 2. Research on the topic of Design for All in Europe.
- 3. Research on the topic of Design for All in Europe.

How these goals are being achieved.

Design for All

Design for All is a design for human diversity, social inclusion and equality. This holistic and inclusive approach is a challenge and a shared challenge for all partners. Designers, entrepreneurs, administrators and political leaders.

There are many ways to create a design for all. It is a network of scientists and researchers who are working on the topic of Design for All in Europe. We are working on the topic of Design for All in Europe.

The network of Design for All is a network of scientists and researchers who are working on the topic of Design for All in Europe.

How these goals are being achieved.

DESIGN DISCIPLINES

The course will be based on cases and will focus on different aspects on how to work with multi storey timber constructions

During the course, we will disseminate international state-of-the-art projects, as well as focus on pre-fabrication in the construction process and how to work with CLT (cross-laminated timber). In addition, the participants will be taught specifically on the topic of sustainability within construction, as well as the value and advantage of working with multi-storey timber constructions. Statistics, knowledge of fire safety and circular design (design for separation) will be central subjects in the processing of the different projects.

The Summer School will be structured around cases featuring multi-storey timber construction design, which will be processed in teams. The course will finish with the presentation of a final project from each team.
